Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Although we discussed Applicant's proposed arguments to overcome the prior art rejection by (1) elaborating on the lack of motivation argument to combine the Murakami reference and (2) a new argument to point out that neither the Gu, Dohjo, and Ono reference teaches a TFT substrate having a first insulating layer as recited in claim 33, allowability was not determined at this time. Only upon receipt of Applicant's arguments will patentability be determined.
